PEACE UDOCHI

Ashiegbuudochi@gmail.com | Lagos, Nigeria

PROFESSIONAL SUMMARY

Results-oriented professional with exceptional time management and multitasking abilities who thrives in fast-paced environments. Experienced working across customer service, logistics, and software engineering environments with strong problem-solving and collaboration skills.

PROJECTS & PORTFOLIO

GitHub: https://github.com/udochi-coder

LinkedIn: https://www.linkedin.com/in/udochi-peace

Portfolio: https://my-portfolio-seven-lovat-26.vercel.app/

Manharrtan Capital Website https://manharrtancapital.com

- Delivered a production website for a Lagos-based finance firm, using Next.js (React, TypeScript) for the frontend and Django REST Framework for the backend, with a loan application flow and an admin dashboard
- Containerised the app with Docker and deployed it on AWS (EC2, RDS PostgreSQL, S3, IAM), with Nginx, HTTPS through Let's Encrypt and a custom domain
- Set up role-based admin access, with private S3 storage for applicants' ID documents and encrypted sensitive fields
- Set up deployment from GitHub using a read-only deploy key, so updates go live with a single command

E-commerce App (Frontend) https://e-commerce-app-kappa-opal.vercel.app/cart

- Built a frontend e-commerce web application using React, featuring product listings, shopping cart, and checkout flow
- Implemented cart management features including adding, updating, and removing items
- Focused on a smooth, responsive, and user-friendly shopping and checkout experience

FoodDash https://food-dash-app-nine.vercel.app/

- Built a full-stack food ordering and delivery platform using Go (backend) and React (frontend)
- Designed endpoints for authentication, restaurant management, orders, and payments
- Deployed the application on Cloudflare Workers for edge hosting

Result Portal https://northstar-uni.vercel.app/

- Built a full-stack result portal web application using Django
- Implemented backend logic and data models for managing academic results
- Deployed the application on Cloudflare Workers

Budget Tracker (Frontend) https://budgettracker-632f3.web.app

- Built a budget tracking frontend application using React
- Integrated Firebase for data storage and hosting
- Implemented features for managing income, expenses, and categories
- Deployed the application via Firebase Hosting

OyaWork API (Django)

- Built a REST API using Django for a platform designed to connect menial job workers directly to employers in Lagos
- Implemented data models and endpoints to support worker and employer onboarding and profiles

- Designed API support for job posting, job requests, and matching between workers and employers

Student Management System API (Flask)
- Developed a backend system using Flask for managing student records
- Implemented CRUD operations for students, courses, and enrollments
- Designed request validation and structured error handling

Student Management System API (FastAPI)
- Developed a backend system using FastAPI for managing student records
- Implemented CRUD operations for students, courses, and enrollments
- Designed efficient request validation using Pydantic schemas
- Built scalable and high-performance endpoints with asynchronous support

SKILLS

- **CRM Software:** Salesforce, HubSpot, Zendesk, Freshdesk
- **Data Tools:** Excel, Tableau, Google Analytics
- **Workflow Automation:** Zapier, Asana, Trello
- **Customer Engagement Platforms:** Intercom, Drift
- **SaaS Platforms:** Slack, Notion, Monday.com, Gainsight
- **Programming Languages:** Python, Java, JavaScript (React.js), HTML, CSS, GoLang
- **Databases, Backend, & Frameworks:** MongoDB, MySQL, POSTGRES, RESTful APIs, CI/CD, Infrastructure as Code, AWS, Docker, Django, Fastapi, Flask, Redux
- **Soft Skills:** Design Thinking, Critical Thinking

WORK EXPERIENCE

AI Data Trainer *2026 – Present*
Sme Careers by SuperAnnotate(Independent Contractor)
- Evaluate and annotate AI model outputs against detailed project guidelines to improve model accuracy.
- Review and rate responses for quality, correctness, and reasoning, and give written feedback.
- Apply technical and domain expertise to flag errors and edge cases in AI-generated code and content.

FullStack Engineer *2026*
Manharrtan Capital Limited(Contract)
- Designed and built the company's website, covering both frontend and backend
- Developed responsive user interfaces and the server-side logic behind them
- Delivered the project within a one-month contract timeline

FullStack Python Instructor *2026*
EdPassare Tech School(Contract)
- Teach Django, covering models, views, templates, and URL routing
- Guide students through building full-stack web applications with Python
- Explain concepts clearly and review students' code with feedback

Software Engineer Trainee *2025 – 2026*
Semicolon Africa
- Collaborated with cross-functional teams to design and develop scalable software solutions.
- Applied AI-assisted tools to improve coding efficiency and debugging.
- Participated in code reviews and agile ceremonies.

- Built and consumed RESTful APIs.
- Strengthened data structures and algorithms knowledge.

Data Entry Personnel *2025 – 2026*
KIRRO.AI | Remote (Dallas,Texas)
- Maintained accurate data records and ensured data integrity.
- Handled large datasets efficiently with attention to detail.

Head of Operations *2025 – 2026*
HEALTHILY VITAE NG |Remote
- Progressed based on performance, leadership, and ability to drive team productivity and efficiency.

Head, Customer Fulfilment Specialist *2024 – 2025*
HEALTHILY VITAE NG | Remote
- Managed customer fulfilment processes and improved service delivery.
- Coordinated logistics and ensured timely order processing.
